

HE Progression Rates

AHWM Research in Brief (2018)

Intervention Group

57%

of AHWM NCOP
students **that engaged**
were accepted to HE
(UCAS)

Comparison Group

37%

of AHWM NCOP
students that **did not
engage** were accepted
to HE (UCAS)

The National Collaborative Outreach Programme (NCOP) aims to increase HE progression rates of disadvantaged students. This report summarises 2018 HE progression data (UCAS acceptances) for a cohort of over 4500 students. The analysis compares outcomes of target NCOP students that have (intervention group) and have not engaged (comparison group) within the programme.

NCOP students are more likely to progress to HE

Evidence suggests that **NCOP students** that engage in the programme are **much more likely to be accepted to HE** than those that do not engage. There also seems to be a **linear relationship** between engagement and HE participation.
